You Deserve the Ultimate Protection  
and Options for your Wood Floors!

- Most Durable
- Design Options
- Available Choices
- Speed of Application
- Faster Cure
- Greener / Lower VOC's

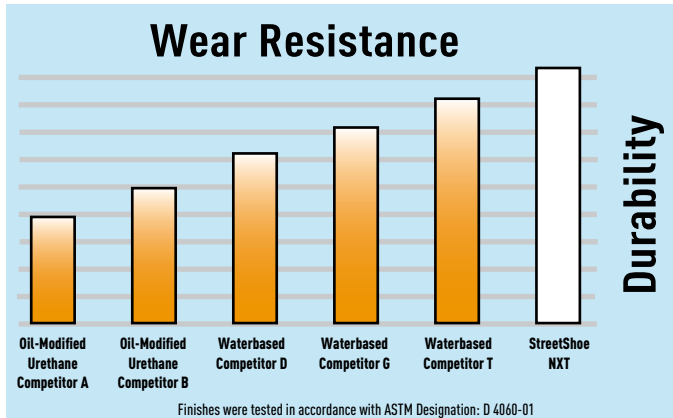

**basic**®  
COATINGS

Where Great Finishes Start

## MOST DURABLE:

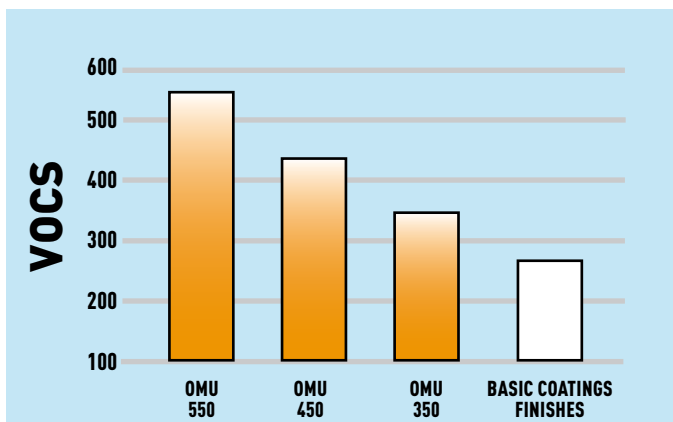

Safeguard your beautiful wood floor with long lasting durability. Basic Coatings<sup>®</sup> StreetShoe<sup>®</sup> NXT is 5 times more resistant to wear than an average oil-modified urethane. Resistance to abrasion is the ability of the coating to withstand mechanical action such as scuffing or erosion.

StreetShoe<sup>®</sup> NXT is the leader in wood floor finish durability.

## GREENER / LOWER VOCs:

All Basic Coatings waterbased sealers and finishes are VOC compliant and can be used everywhere throughout North America. The lower the VOCs, the lower the odor. In addition to lower odor during installation, because waterbased sealers and finishes cure faster, the lower odor dissipates faster. All Basic Coatings waterbased sealers and finishes are LEED compliant.

Comparing waterbased products against oil-modified urethanes. Please refer to Basic Coatings Technical Data Sheets for complete product information.

## DESIGN OPTIONS:

Whether you prefer a clear or traditional warm amber look finish, Basic Coatings can offer both options to fit your style.

## AVAILABLE CHOICES:

No other manufacturer offers more sheen levels than Basic Coatings. Whether you are looking for gloss, semi-gloss, satin, or super matte, we have you covered. We even offer Pure Matte<sup>®</sup> for the most discriminating of tastes.

## SPEED OF APPLICATION:

With the quick dry times of Basic Coatings waterbased sealers/ finishes, you can actually apply more coats on the floor faster, and ultimately complete the job sooner!

## FASTER CURE:

In addition to completing the job sooner, you can get back to using your floor faster! StreetShoe NXT is the fastest curing finish on the market. It achieves 90% cure in 24 hours.
