Where Great Finishes Start

Easy to Use

The TyKote® Dust-Free Refinishing System utilizes the powerful two step cleaning solutions of I.F.T™ & Squeaky™ to remove dirt or contamination from any wood floor. The genius of the system combines the innovation Basic Coatings® is known for, with the compact Dirt Dragon® floor cleaning machine. I.F.T & Squeaky ensure a clean uncontaminated surface — eliminating the need for heavy sanding equipment and trailer mounted vacuum systems.

Proven

The TyKote Bonding Agent pulls the whole system together. It ensures a proper bond for the finish — to almost all finishes, including most hard to coat aluminum oxide pre-finished flooring. No other manufacturer can duplicate or even match the TyKote System — and they've been trying for ten years.

A Great Finish

A good start deserves a great finish. Basic Coatings' StreetShoe® is the industry benchmark for exceptional wear and durability. StreetShoe is 90% cured in 24 hours, therefore the floor can be recoated tonight and ready tomorrow. StreetShoe is the ultimate choice for a beautiful floor.

3 Easy Steps to a Perfect Finish...

Use Basic Coatings® TyKote® System and Dirt Dragon™ to make refinishing floors almost as easy as **1,2,3!**

STEP 1 **Prep & Clean**

Test the floor with Acrylic Test Kit. If there is acrylic present, use Dissolver and Dirt Dragon™ to strip off the acrylic and then rinse/neutralize with Squeaky™. If there is no acrylic present, scrub floor with IFT / water solution. Follow with Squeaky to neutralize.

STEP 2 **Bond**

Apply TyKote bonding agent to floor* with a Basic Coatings' Microfiber Mop.

*Formulated for use on most pre-finished, engineered or site-finished wood flooring.

STEP 3 **Finish**

Apply StreetShoe® for a beautiful and durable finish.
