

Raw™ Sealer

TONED WATERBASED WOOD FLOOR SEALER

Raw™ Sealer is an innovative waterbased wood floor sealer designed to offer the stylish look of dry untreated natural white oak wood floor.

During application, this product offers a distinctive wet sealer indicator hue that allows the installer to easily see where product has been applied to ensure proper application and coverage throughout the installation. Once dry, the sealer helps prevent tannin pull during application of approved waterbased finishes.

Basic Coatings® Raw™ Sealer has been formulated to resist tannin pull and offer the appearance of an untreated dry white oak floor.

Coat Raw Sealer with any approved Basic Coatings finish with desired sheen level. For the most natural untreated look, use PureMatte™ or StreetShoe® NXT Super Matte for your top finish coats.

Unique • Raw White Oak Look

This pre-catalyzed waterbased sealer is ideal for White Oak when a untreated natural look is desired. The “Wet Sealer Indicator” hue allows the installer to easily see where product has been applied to ensure proper application and coverage throughout the installation.

RAW SEALER ADVANTAGES

- ◆ Designed predominantly for White Oak
- ◆ Offers natural dry looking color
- ◆ Helps prevent tannin pull
- ◆ Wet sealer indicator: applies with slight hue for proper coverage which also prevents any missed spots
- ◆ Single component: Pre-catalyzed
- ◆ Can be used on any species to tone the wood color
- ◆ Fast Drying (2-3 Hours)
- ◆ Low VOC 275

Please refer to Technical Data Sheet for complete product information.

“We could not be more excited about the Basic Coatings launch of their new Raw Sealer. The combination of this ‘naked look’ sealer with their PureMatte™ ultra low gloss two component waterbased topcoat is the perfect solution for customers seeking that natural, unfinished look who also need maximum durability and clean-ability.”
