

HyperTone™ Stains VOC Calculation Chart

Find the stain color you are using and find the number that corresponds to the amount of stain glide you are adding. This will give you the total VOC for your particular mix. Check VOC regulations in your local area to be sure you are compliant. All HyperTone™ Stains are under 250 VOC's prior to adding StainGlide.

OUNCES ADDED	JET BLACK	AMBER OAK	BLUE	CABERNET	DEEP RED	GOLD	HICKORY	ONYX	SLATE	TOBACCO	WHITE	PROVINCIAL	CLEAR	NEUTRAL BASE
