

## Aggressive Wood Floor Cleaner

Intensive Floor Treatment (I.F.T.) is the first step in a two-part cleaning system designed to prepare floors for the application of TyKote<sup>®</sup> in the TyKote Dust-Free Refinishing System. I.F.T. is a powerful cleaner designed to remove tough oil, dirt, and other residue from the floor. I.F.T. is a vital part of the preparation process and should never be omitted.

### PROPERTIES

Color.....	Lavender (Light Purple)
Density.....	8.30 - 8.40 lbs/gallon
PH.....	12 - 14
VOC.....	At minimum dilution does not exceed 2% by weight
Flash Point.....	107° F
Freeze/Thaw Stability.....	Stable
Packaging.....	1 US gallon plastic pail (4 per case) 5 US gallon plastic pails 55 US gallon plastic drum

### APPLICATION METHOD

- To prepare the floor for the cleaning process, remove all caked mud, chewing gum and other debris from the floor. Vacuum the dirt from the floor. Pay special attention to corners.
- Prepare a diluted solution of I.F.T. using 4 parts water to 1 part I.F.T.
- Soak several clean towels in the solution and wring them until nearly dry.
- Wrap a towel around a push broom and tack the floor. To prevent redeposit of dirt and oil, refold towel using clean sides as needed. Pay special attention to corners.
- Repeat steps 3-4 in each area of the floor until the entire floor has been cleaned.
- NOTE: For stubborn surface marks, dirt and shoe marks, use a moderately abrasive nylon pad or sponge moistened with diluted I.F.T. solution and scour area manually until spot is removed. Follow with a clean water rinse on scrubbed area.
- Always rinse the floor by damp mopping with clean water and a clean mop until the rinse water is clean or use tack towels with clean water. Pay special attention to corners.
- Clean the floor again using Basic Coatings<sup>®</sup> Squeaky<sup>™</sup> cleaner, following the same cleaning procedure described above (Steps 2-4). Since Squeaky cleaner does not leave a residue, no clear water rinse is needed after this step. The two cleaners are specifically formulated to remove different types of contaminants from the floor and may NOT be combined into a single treatment.

### ALTERNATE APPLICATION METHOD

- Prepare a diluted solution of I.F.T. using 4 parts water to 1 part I.F.T. in a mop bucket.
- Soak string mop in the solution and wring excess out.
- Mop the floor paying special attention to corners. Resoak and wring mop frequently. Mop until the entire floor has been cleaned.
- Always rinse the floor by damp mopping with clean water and a clean mop until the rinse water is clean or use tack towels with clean water. Pay special attention to corners.
- Clean the floor again using Squeaky cleaner, following the same cleaning procedure described above. Since Squeaky cleaner does not leave a residue, no clear water rinse is needed after this step. The two cleaners are specifically formulated to remove different types of contaminants from the floor and may not be combined into a single treatment.

### AUTO-SCRUBBER APPLICATION METHOD

If using an automatic scrubber, use at a dilution rate of 8 oz. per gallon (1 part I.F.T. to 16 parts water) with a microfiber cleaning pad. Make sure squeegees and buffing pads work well. A person with a mop must follow behind the scrubber to pick up any water that is not picked up from the machine. Pay special attention to corners.

### PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. FOR INDUSTRY USE.

**WARNING ! FLAMMABLE LIQUID AND VAPOR. CAUSES SERIOUS EYE IRRITATION.** Wear protective gloves: 1 - 4 hours (breakthrough time): disposable vinyl. Wear eye or face protection: Recommended: safety glasses. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Wash hands thoroughly after handling.

**FIRST AID:** IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. Store in a well-ventilated place. Keep cool. Dispose of contents and container in accordance with all local, regional, national and international regulations.
